

Model GL Force Gauge

The Dillon GL Force Gauges measure both compression and tension, weight and force. Includes many features not found in a gauge at this price. Rugged metal die cast enclosure, backlit LCD display and serial output. Powered by the internal rechargeable battery or directly by its 120 VAC charger. Displays Newton, pound-force and kilogram-force units of measure at 2000 division resolution. Choose from five capacities.

The GL is supplied with a convenient carry case that also stores six popular grips/fittings and the charger. Also includes a STATEMENT OF ACCURACY CARD and user guide.

The GL may be used hand-held or mounted with its threaded hole pattern. The CT Manual Test Stand is a perfect match for the GL.

Part Number	N	kgf	lbf	List Price
36321-0022	25	2.5	5.5	\$335
36321-0030	50	5	11	\$335
36321-0048	100	10	22	\$345
36321-0055	250	25	55	\$355
36321-0063	500	50	110	\$370

CT Test Stand

The CT Test Stand is used for compression and tension testing applications up to 500 N/110 lb/50 kg. Includes test stand, handwheel, feet, 10-32 screws (*for mounting GS/GTX*) and wrench. GL test stand mounting screws are included with GL gauge

Part Number	List Price
52751-1885	\$520

The CT stand aligns perfectly with the Dillon Model GL Force Gauge. Other gauges require the tension alignment accessory if the stand will be used for tension tests. The tension alignment accessory has both M6 and 10-32 threads to connect with most popular fixturing.

Option	List Price
AWT15-500192 Tension alignment accessory	\$160
